

Introduction to Social Demography | SOU33132

Year	Junior Sophister
ECTS Credits	5
Contact Hours	22
Pre-requisite	
Semester	2
Module Leader & Lecturer	Dr. Nicole Kapelle
Contact Email	TBC

Module Outline:

This brand-new course provides an introduction to social demography, focusing on the study of population dynamics and their impact on social structures and processes. Students will explore fundamental demographic concepts, methods, and theories, examining patterns and trends in fertility, mortality, migration, family formation, population aging, and population health. The course emphasizes the social determinants and consequences of demographic behaviours. Through lectures and tutorials, students will gain a comprehensive understanding of the interactions between population changes and social phenomena.

Module Learning Objectives:

- TBC

Assessment:

- 80% Essay
- 20% Student presentation
