

Trinity College Dublin

Coláiste na Tríonóide, Baile Átha Cliath

The University of Dublin

ZOOLOGICAL MUSEUM

SCIENCE FOR SCHOOLS

An interactive workshop for primary school children of all ages. Available **June**

Cost: €5.00 per student

Location: Zoological Museum, Trinity College Dublin

To book your place:

Email: zoology.museum@tcd.ie

Web: <https://www.tcd.ie/Zoology/museum>

Learning Outcomes:

- Understanding form and function
- Making comparisons
- Using observations
- Identifying associations
- Prey/predator relationships

SKELETONS and SKULLS

Students will handle, observe and compare a variety of skulls, bones and teeth from our museum collection of over 25,000 objects. Guided by our trained zoologists, students will understand how bones grow, how teeth work and how skeletons differ. They will learn about food chains and how they affect prey/predator relationships. With the aid of mirrors, students will examine their own teeth and consider how they use different types of teeth for eating.

SKELETONS and SKULLS

SEE, LEARN, DISCOVER

A new interactive experience for primary school children

Why do animals have tails?

**How does a python
swallow a gazelle?**

**Why do sharks grow new
teeth every ten days?**

**What happens when you
break a bone?**

**Why do some animals
have their skeletons
on the outside?**

**What does the inside
of a bone look like?**

**How many toes
does a horse have?**

Find out at the **Zoological Museum, Trinity College Dublin**
Bookings for June now available

Entry 5 Euro per person. Group rates available.
